WEB DESIGNING

Course Duration: 60 Hrs.

Course Fee: Rs.12,000

→ HTML

- HTML the Language of the Web
- Basic HTML Tags
- Basic HTML Body Tags
- Coding Style
- All about Links

→ Creating Css Layouts

- Creating Tag & Class Styles
- Creating Divs with ID Styles
- Using Margins for Positioning
- Changing Page Properties Styles
- Reviewing CSS Code

→ Designing with CSS

- Comparing Margins & Padding
- Creating a Page from a Template
- Using Styles to Align Images
- Calculating CSS Spacing
- Styling Headlines
- Using Bootstrap or designing
- Customizing design with Bootstrap

→ Live Project Training

- Creating a Professional website design
- Developing Design in website
- Implementing it on web server

→ Javascript

- Identify the need for Java Scripts
- Apply escape characters
- Differentiate between web server, web page and web site
- Create an Array object and apply its methods
- Use Arithmetic, Logical and Assignment operators

→ JQuery

- What Are Javascript And JQuery
- Programming/Coding Principles
- Selecting And Manipulating Elements
- Animation And Queuing
- Drag And Drop Features

→ Responsive Website Design

- Using HTML5 & CSS3
- Making website device friendly
- Implementing Bootstrap for responsive
- Implementing JQuery for Responsive

→ Website Hosting

- Domain name registration
- Hosting Space
- Using CPanel
- Setting up mail ids and other features

Other Courses Available:

SEARCH ENGINE OPTIMIZATION

Course Duration: 45 Hrs.

Course Fee: Rs. 10,000

→ SEO Training for ON-PAGE

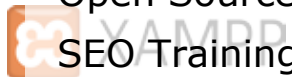

- Initial Site Analysis
- Competition Analysis
- Site Structure & Link Depth
- Keyword Research & Competition
- Density Analysis and Keyword Placement
- HTML Basics
- Title Tags & its importance
- Meta Tags Development
- URL & Content rewriting for SEO
- Heading Tags, H1, H2, H3
- Anchor Text & Alt Text
- Footer Nav Bars
- Creating of Sitemaps
- Site Submitting to Google / Bing Webmaster Centre
- Google Sitemap Creation
- Yahoo Sitemap Creation
- Google Webmaster Account Setup and management
- Google Analytics (Statistics) setup and management
- SEO Tools
- Panda Update & Penguin Update
- Google algorithm updates

→ SEO Training for OFF-PAGE

- Java programming language
- Creating an Index
- What are Links ?
- The importance of Links for SEO
- Link Types
- Link Building Techniques
- Directory Submission
- Article Marketing
- Submitting Press Releases & news syndication
- Alexa Insights
- Google Hot Trends and Insights
- Geo Targeting & Local Listing
- Blog creation & promotion
- Forum & QnA
- Online Reputation Management
- Sandbox Effect & SILOS
- Search Engine Spam
- Optimizing Google & MNS
- Special Site maps
- White Hat / Black Hat / Grey Hat SEO
- Syndicate content (Feeds)
- Webmaster Edge
- Managing SEO of Dynamic websites
- Google Ad Words (setup only)
- SEO Reporting
- Favicons & its importance

WEB DEVELOPMENT

Course Duration: 60 Hrs.

Course Fee: Rs.12,000

→ PHP Programming Basics

- Syntax of PHP
- Embedding PHP in HTML
- Introduction to PHP Variable
Writing Statements and Comments
- Embedding HTML in PHP
- Using Operator
Understanding Data Types
- If(), else if() and else if condition Statement

→ PHP Functions

- Creating an Array
- Modifying Array Elements
- Processing Arrays with Loops
- Grouping Form Selections with Arrays
- Creating User-Defined Functions

→ PHP Advanced Concepts

- Reading and Writing Files
- Reading Data from a File
- Managing Sessions and Using Session Variables
- Destroying a Session
- Storing Data in Cookies
- Executing External Programs

→ Introduction to Database - MySQL Database

- Understanding a Relational Database
- Introduction to MySQL Database
- Understanding Tables, Records and Fields
- Understanding Primary and Foreign Keys
- Understanding SQL and SQL Queries
- Dealing with Dates and Times
- Executing External Programs
- Understanding Database Normalization

→ Working with PHP & MySQL

- Managing Database Connections
- Processing Result Sets
- Queries Which Return Data
- Queries That Alter Data
- Handling Errors

→ PHP Project

- Project Discussion
- Requirements analysis of Project
- Project code Execution
- Project Testing

MICROSOFT .NET 4.0

Course Duration: 60 Hrs.

Course Fee: Rs.12,000

→ Introduction to .NET

- Overview of the .NET Framework
- How .NET is Different from Traditional Programming
- Common Language Runtime (CLR)
- Common Type System (CTS)
- .NET Namespaces

→ Language Fundamentals

- C# Program Structure
- Defining Namespaces
- Understanding C# Data Types
- Defining Variables and Constants
- Performing Type Conversions
- Formatting Numbers, Date and Times

→ Functions and Parameters

- Defining Static and Instance Functions
- Passing Parameters by value and by Reference
- Overloading Functions
- Optional Parameters
- Using Variable Length Parameter Lists

→ Using Controls

- Working with HTML Controls
- Working with Web Controls
- Creating Controls at Runtime

→ Maintaining State

- Understanding why the Web is Stateless
- Maintaining State within ASP.NET Applications
- Using the Application Object
- Using the Session Object
- Reading and Writing Cookies

→ Using XML

- Understanding XML and XML Schemas
- Reading XML Data with a DataSet
- Writing XML Data with a DataSet

→ WCF (Windows Communication Foundation)

- Architecture of WCF
- Project Template of WCF
- WCF Composition
- Building a WCF Service
- Hosting a WCF Service

→ Introduction to Visual Studio

- Setting Profiles
- Creating a Project
- Using the Code Editor
- Setting Project Properties
- Adding References
- Compiling a Program
- Running a Program

C++ TRAINING

Course Duration: 40 Hrs.

Course Fee: Rs. 5,000

→ Introducing C++

- Some Remarks About Programming
- The Origins of C++
- ANSI C++
- The C++ Programming Environment in UNIX
- An Example C++ Program
- Simple Flow of Control
- Preliminary Remarks about Program Style

→ Functions

- Functions and Function Prototypes
- Returning Values from Functions
- External Variables and Scope Rules
- Static Variables
- Call by Value and Recursion

→ Pointers and Arrays

- Pointers and Addresses
- Pointers as Arguments to Functions
- Arrays
- The Relationship of Pointers and Arrays
- Pointer Arithmetic
- How C Deals with Multi-Dimensional Arrays

→ Reference Parameters

- Polymorphism and Overloading
- Procedural Abstraction and Good Programming Style
- Splitting Programs into Different Files

→ Structures

- Fundamentals of Structures
- Passing Structures as Arguments to Functions
- Returning Structures as Return Values from Functions
- Arrays of Structures
- Pointers to Structures

→ Input-Output

- Standard Input and Standard Output
- Formatted Output - Printf
- Formatted Input - Scanf
- The Dangers of Scanf
- File Access and File I/O

→ Data Types

- Integers
- Real numbers
- Type Casting
- Characters
- User Defined Data Types

→ Functions and Procedural Abstraction

- The Need for Sub-programs
- User-defined Functions
- Value and Reference Parameters
- Functions which use Value Parameters are Safe

C# WITH ASP.NET

Course Duration: 60 Hrs.

Course Fee: Rs.12,000

→ Introduction to .NET

- Overview of the .NET Framework
- Common Language Runtime (CLR)
- .NET Assemblies
- .NET Framework Class Library

→ Introduction to Visual Studio

- Setting Profiles
- Creating a Project
- Using the Code Editor
- Setting Project Properties
- Debugging a Program
- Compiling a Program

→ Language Fundamentals

- C# Program Structure
- Defining Namespaces
- Understanding C# Data Types
- Defining Variables and Constants
- Performing Type Conversions

→ Functions and Parameters

- Defining Static and Instance Functions
- Overloading Functions
- Optional Parameters
- Defining and Using Arrays

→ Introducing ASP.NET

- Overview of ASP.NET 4.0
- Understanding Client-Side vs. Server-Side Execution
- Working with Web Forms
- Understanding ASP.NET Application Folders

→ Object-Oriented Programming

- Overview of Object-Oriented Programming
- Defining and Using Classes
- Extending .NET Classes via Inheritance
- Defining and Using Classes
- Understanding the Role of Interfaces in .NET
- Working With Enumerations

→ Creating ASP.NET Pages

- Building ASP.NET Pages
- Using Page Directives
- Working with the Code-Behind Model
- Understanding the Life-cycle of a Web Form
- Handling Page Events

→ Deploying ASP.NET Applications

- Overview of ASP.NET Deployment Options
- Using Copy Web Site Tool
- Using Publish Web Site Tool
- Using Web Setup Projects

C PROGRAMMING TRAINING

Course Duration: 30 Hrs.

Course Fee: Rs. 4,500

→ Getting Started

- Background
- Sample Program
- Components of a C Program
- Naming conventions for Variables
- Defining Arrays

→ Functions and Operators

- Invoking Functions
- Elementary Operators
- The Operator= Operators
- The Conditional Operator

→ Strings

- Fundamental Concepts
- String Functions
- Higher Dimensional Arrays
- An Array as an Argument to a Function

→ Structures

- Fundamental Concepts
- Describing a Structure
- Functions Returning Structures
- Passing Structures to Functions
- Structures vs Structure Pointers

→ Separate Compilation

- Compiling Over Several Files
- Function Scope
- Program Scope
- Local Static
- Object Files
- The C Loader

→ Information About Files

- The Start Function
- File Existence
- Telling Time - Time
- Ctime

→ Useful Library Functions

- Strstr - Is One String a Substring
- System - Execute a Command Line Command
- Math Functions
- Character Testing Functions

→ Appendix. Reference Tables

- Important Header Files
- Printf Formats
- C Reserved Words
- Conversion
- Precedence Charts

Digital Marketing

Course Duration: 60 Hrs.

Course Fee: Rs. 20,000

→ Google Adwords

- Introduction to Adwords
- Campaign Management!
- Account Management!
- Keyword Targeting!
- Language and Location Targeting!
- Different Ad Formats!
- Budgets and Bidding!
- Measurement analysis and Optimization!
- Review & course correction
- Managing Multiple Accounts!
- Search Fundamentals Review!
- Ad Formats!
- Ad and Site Quality & Landing Page!
- AdWords Tools!
- Performance Monitoring and Reporting!
- Optimizing Performance!
- Performance, Profitability, and Growth!
- Introduction to AdWords API & Adwords Editor!
- The Google Display Network!
- Display Ads on YouTube
- Display and Video Ads on Mobile Devices!

→ Search Engine Optimization (SEO)

- How Search engines work?
- Doing Keyword Research with Google Keyword planner
- Difference between On-page and Off-page optimization
- On-Page SEO
- Off-Page SEO
- Why is Google Algorithm so important?

→ Google Analytics

- What is Web Analytics?
- How Google Analytics works?
- Understanding goals and conversions
- User Management
- Understanding bounce and bounce rate?

→ Social Media Marketing

- What is Social Media Marketing?
- How Social Media Marketing works?
- Challenges of Social Media marketing
- Types of Social Media Marketing
- Best platforms to do opt-in Social Media marketing

CORE JAVA

Course Duration: 40 Hrs.

Course Fee: Rs. 7,000

→ Introduction to Java

- What is java?
- Object Oriented Programming
- Internet Programming
- Platform Independency
- Internet Security
- C,C++ VS Java

→ Packages

- Introduction of Package
- Programs related to Packages
- Scope of Access Modifiers

→ OOPs Concepts and their Implementation in Java

- OOPs concept , its properties and uses
- Class Member and instance members
- Java First Program
- Role of Constructor
- Overloading and Overriding
- Introduction to JSP
- Dynamic Binding and Static Binding

→ Exception Handling

- Introduction of exception and Error
- Try, catch and finally blocks
- Throw and throws Keywords
- Checked and Unchecked Exception

→ Multithreading

- Use of Sleep() and Suspend Methods
- Integrated Thread Synchronization
- What Is the JDBC API?
- Driver Types
- Connection Overview
- Concurrency Types

→ JDBC SQL Programing

- Error Checking and the SQLException Class
- The SQL Warning Class
- JDBC Types
- Executing SQL Queries
- Transaction Management

→ Internet Programming using Applets

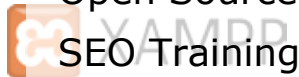

- Getting Started With Applets
- Defining an Applet Subclass
- Life Cycle of an Applet
- Applet's Execution Environment
- Developing an Applet

→ Networking

- Introduction to Networking in Java
- What is TCP and UDDP
- What is Socket and Port
- URL in terms of Java Networking Programing
- Datagram in Network Environment

ADVANCED JAVA(J2EE) TRAINING

Course Duration: 40 Hrs.

Course Fee: Rs. 8,000

→ Introduction of J2EE

- Introduction to Enterprise Edition
- Distributed Multitier Applications
- J2EE Containers
- Web Services Support
- Packaging Applications
- J2EE 1.4 APIs

→ Server Programming using Servlets

- What is Web Application?
- What Is a Servlet?
- Servlet Life Cycle
- Sharing Information
- Using Scope Objects
- Controlling Concurrent Access
- Getting Information from Requests
- Constructing Responses
- Programming Filters
- Specifying Filter Mappings

→ Java Server Pages (JSP)

- JavaServer Pages Technology
- The Life Cycle of a JSP Page
- Translation and Compilation
- Jsp Basic Tags and its uses
- Deactivating Expression Evaluation
- Implicit Objects
- JavaBeans Components

→ Struts 2.x

- Introduction to Struts 2.x
- MVC and Struts 2 Architecture
- Actions, Results & Interceptors
- Object Graph Navigation Language (OGNL)
- Struts 2 Presentation Tags
- Role of ActionInvocation and ActionContext
- Manipulating data on ValueStack
- Creating Custom Interceptors and Results
- Validating Action Properties
- Generating Composite Views using Tiles

→ Hibernate 3.x

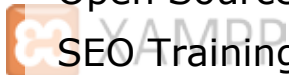

- Introduction to ORM and Hibernate
- Hibernate Architecture
- Hibernate Configuration
- Introduction to Session and SessionFactory
- Persisting Objects using Hibernate
- Integrating JPA & Hibernate

→ Spring 3.x

- Introduction to Spring
- Understanding Inversion of Control (IOC) and Dependency Injection (DI)
- Spring Architecture
- Implementing IOC in Spring
- Introduction to Spring MVC

ANDROID DEVELOPMENT TRAINING

Course Duration: 50 Hrs.

Course Fee: Rs. 10,000

→ Introduction to Android

- Introduction to Android
- Brief history of Android
- What is Android?
- Why is Android important?
- What benefits does Android have?
- Why to choose Android?

→ Getting Started

- How to select Android version?
- Step to create new project
- Creation of New AVD
- Creating run configuration
- Creating your first Android activity
- List of basic sample programs

→ Android Views

- Grid View In detail With Example
- Map View In detail with Example
- Cont. Sub Topical Views
- Web View In detail with Example
- Spinner In detail with Example
- Google Map View In detail with Example

→ Introduction to Drawers

- Navigation Drawer
- Simple Side Drawer
- Tab Drawer

→ Introduction to Menus

- How Search engines work?
- Types of Android Application Menus
- Option Menu
- Expanded - In detail with Example
- Context Menu In detail with example
- Sub Menu-In detail with example

→ Android Layouts

- What are views, Layouts and there Classification?
- How Android Draws views and Layout Classification?
- Table Layout In detail with Example
- Tab Layout In detail with Example
- Frame Layout In detail with Example

→ What are Fragments?

- Multipane & Singlepane
- Fragment Life Cycle
- Addition of Fragments
- Fragments Working without UI

→ Handling User Interaction Events

- Handling user events
- Different types of event listener
- OnClickO
- OnTouchO
- Different types of event handler
- OnTrackballEvent (MotionEvent)

GRAPHIC DESIGNING TRAINING

Course Duration: 50 Hrs.

Course Fee: Rs.12,000

→ Adobe Photoshop

- What is Photoshop?
- Drawing Things on the Canvas
- Backboard Under painting
- Shadows
- Pen Tool

→ Getting Started With Corel Draw

- Introduction to Corel Draw
- Features of Corel Draw
- Corel Draw Interface
- Moving from Adobe
- Common Tasks

→ Applying Effects

- Power of Blends
- Distortion
- Contour Effects
- Envelopes
- Lens effects
- Transparency
- Creating Depth Effects

→ Graphics

- Importing graphics
- Editing and cropping images
- Using the picture palette

→ Introducing Illustrator

- Using the Welcome Screen
- Introducing Vector Based Paths
- Working with Layers in Illustrator
- Saving the Document
- Utilizing Illustrator Startup Documents

→ Page Layout

- Creating and saving documents
- Opening and editing documents
- Using guides
- Creating and using templates
- Changing contents of frames

→ Typography

- Modifying character attributes
- IModifying paragraph formats
- Importing text
- Adding bullets and numbering

→ Colour

- The colour palette
- Creating process, spot, tints and special colours
- Applying fill and stroke colours
- Changing stroke weights

EXCEL BASICS COURSE

Course Duration: 25 Hrs

Course Fee: Rs. 2,500

→ Foundation

- Excel Introduction
- Excel Introduction
- Basic Navigation and Editing
- Getting Going

→ Orientation and Efficiency

- Editing
- Viewing
- Spreadsheet Structure
- Cell References
- Named Ranges
- Basic Macros
- Design

→ Administration

- Customising Excel
- Connecting Workbooks
- Protecting and Sharing
- Excel Troubleshooting
- Documentation
- Google Docs

→ Data Handling

- Sorting and Filtering
- Controlling User Input
- Working with Dates and Times
- Working with Text
- Lookup and Reference
- Logical Functions

→ Data Analysis

- Working with Numbers
- Summarising Data
- Simple Summaries
- Manipulating Data
- Interpreting Data
- PowerPivot: Handling Big Data
- Formula Auditing

→ Presentation

- Cell Formatting
- Number Formatting
- Conditional Formatting
- Graphs and Charts
- Page and Print Setup
